

Global headhunter Nigel Wright opens second Swedish office in Malmö

Stockholm, Sweden – January 21, 2015

Nigel Wright Group, one of Sweden's leading specialist search and selection companies, has opened a new office in Malmö last week to service its expanding portfolio of clients.

Since launching in Stockholm in 2006, Nigel Wright Sweden has consistently been one of Nigel Wright's best performing divisions.

Nigel Wright believes it already has an excellent exposure to the Swedish executive market, yet this additional office will give the business the added ability to get closer to its clients and offer a greater diversity of specialist sector and discipline knowledge, as well as expertise which is not locally or regionally limited.

Tobias Sjöberg, who has recently rejoined Nigel Wright as Regional Manager after working as a Key Account Manager for a global FMCG business, will be relocating to Malmö, where he will focus on developing relationships with key clients in the region. The company will be looking to hire additional consultants over the next few months to facilitate its expansion.

Rebecca Eileryd, Associate Director Sweden, commented:

'Malmö is a key region with key clients...

We will be hosting regular events, Directors' Dinners, and sponsoring Supplier of the Year at the Swedish retail awards...

There will be an abundance of opportunities to be capitalised on in Malmö and beyond...

We have strong industry relationships in Sweden and we are as committed as ever to growing our presence in this vital geographic region...'

Nigel Wright delivers search assignments on a local, regional and global scale. These assignments are typically for large, multinational companies as well as smaller, private equity backed businesses. They involve the identification and selection of senior talent for key strategic roles.

Headquartered in Newcastle, UK, Nigel Wright operates through an international office network which includes Stockholm, London, Aberdeen, Paris, Oslo, Helsinki, Copenhagen, Aarhus, Madrid and Dusseldorf. The network operates in a non-partner structure which allows the business to borrow and share international expertise, assuring true cross-border agility.
